Quality Management

Quality is of paramount importance to all team members at SINGLAD & SINCLAIR. We are continually evaluating and improving the level of service we offer our clients to ensure the reputation for quality which we are building is maintained and grown. We are committed to execution of projects that are not just fit-for-purpose, but which exceed expectation in terms of quality. Our reputation for both the quality of our project management and finished projects is achieved through our proven Quality Management System.

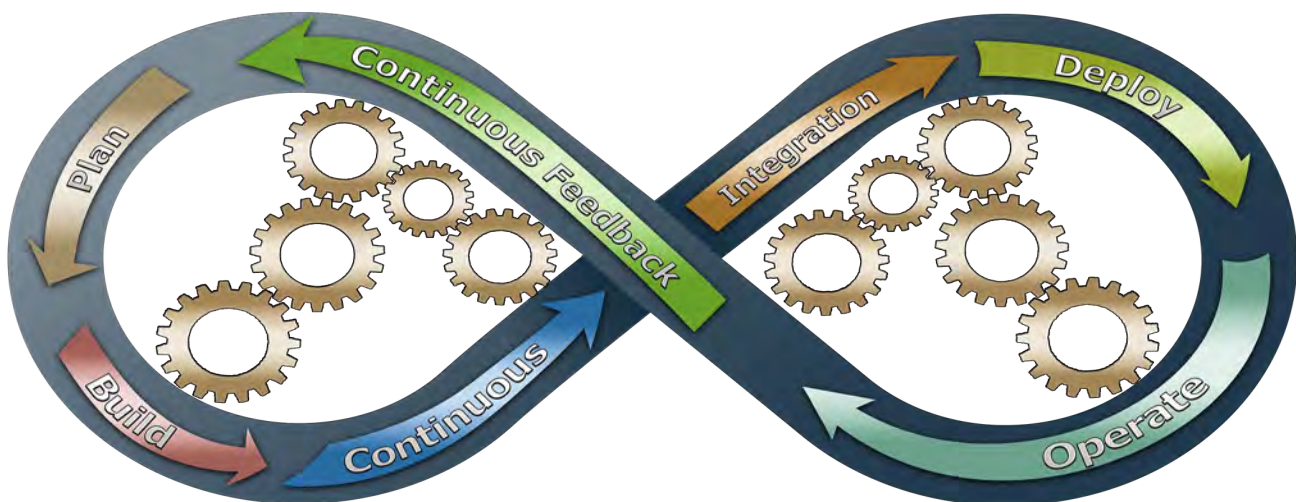

The success of our company rests with the image of our services and performances. Maintaining and expanding our worth is directly dependent on quality and reliability of these services. These fundamental considerations are also laid down in SINGLAD & SINCLAIR LTD'S philosophy:

- Our activities focus on our customers.
- We are committed to Quality and Safety at work.
- Cooperation in a spirit of trust and confidence includes all members of staff.
- The Company and the job it provides are secured by economic success.

We guarantee to the customer to carry out his orders/specifications with the highest safety and reliability by putting into action the (QMS) Quality Management System. By manifesting the corporate structure and internal procedures to all employees, this system encourages the co-operation within the Company. It contributes to deepening the spirit of trust and confidence between SINGLAD & SINCLAIR LTD on one side and customers and suppliers on the other, thus, promoting permanent business relationships. The Board of Directors has in many occasions advised all employees to verify the efficiency and implementation of the regulations. Every employee is entitled and obliged to point out to his superior officer circumstances, which prevent procedures as demanded by the client. The superior officer will then initiate adequate measures to remove/correct these circumstances.

Our Quality system is an integral part of our existing management process which sets the high standards of co-operation required by all members of staff to ensure that the quality of service we provide to our clients is second to none.

The purpose of such a Quality system is to "DO IT APPROPRIATELY WITHOUT FAULTS". Our Directors and staff are committed to driving this process actively to give our clients the satisfaction of knowing that we will deliver exactly what we promise.

At SINGLAD & SINCLAIR, we have a set policy that has committed our staffs (Directors-Field engineers,) to the consistent use and enhancement of Integrated management systems governing our Health, Safety, Environmental and Quality Codes of Practice. These systems are supported by documents that are continually reviewed and improved in line with industry best practice.

First and foremost, the guarantee of the health and safety of our employees and of all those effected by our construction operations is an absolute pre-requisite to conducting any work at any time. We have developed our systems and procedures over many years based on these ethics.

Implementation of our environmental policy is strongly supported by our Board of Directors and through the empowerment of all of our employees. The Management System Committee coordinates the network of environmental correspondents, organizes technical working groups bringing together experts from each business line and guides the Group's overall environmental action policies. We are proud of our management systems, which have been developed and constantly improved on since the inception of our company. They are an integral part of our management activity and are implemented through a comprehensive set of procedures and controls which are documented in accordance with ISO 9001:2008.
